# Badger Fire Protection

## ABC Dry Chemical Fire Extinguishers

- Square thread valve design
- Heavy duty metal siphon tube
- No-scratch hose strap
- Large pull pin

Part#	Description/Size
21007866B	5lb ABC
21007867B	10lb ABC
21007868B	20lb ABC

# Buckeye Fire Equipment

## ABC Dry Chemical Fire Extinguishers

- Anodized metal & brass valve assemblies for superior strength and corrosion resistance
- Rechargeable
- Color-coded gauges show operating status at-a-glance

Part#	Description/Size
13315	2-1/2LB abc w/ Bracket
11310	10lb ABC Short
12905	30lb ABC

# Buckeye Fire Equipment

## CO2 Stored Pressure Fire Extinguisher

- UL Rating 5
- Industrial-grade construction, powder coated for corrosion resistance
- Metal pull pins and wall bracket for long service life
- Rechargeable

Part#	Description/Size
45100	5lb CO2
45600	10lb CO2
46100	15lb CO2
46600	20lb CO2

# Buckeye Fire Equipment

## Wet Chemical 6 Liter Class K Fire Extinguisher

- Capacity: 6 Liters
- Stainless steel cylinder
- Low "pH" potassium acetate and potassium citrate solution
- Protective non-metallic nozzle tip finger guard

Part#	Description/Size
50006	6 Liter Class K

# Buckeye Fire Equipment

## Stored Pressure Water Fire Extinguisher

- Water pressurized for use on Class A fires
- Vehicle brackets for extended unit service life
- Color-coded gauges show operating status at-a-glance

Part#	Description/Size
50000	2-1/2 Gallon H2O

## Larsen's Architectural Series Recessed Cabinet

LPI-RPAS182	5in x 6in 3D

## LPI Fire Fire Extinguisher Vinyl Stickers

- Heavy duty vinyl
- Silkscreened with UV inks and clear lamination
- Easy application

Part#	Description/Size
LPI-105	4in x 4in Fire Ext. Inside
LPI-108	4in x 12in Fire Ext. Sign

Keeping your fire extinguisher properly maintained is important. Stop by our office today to get yours inspected, refilled or repaired.

# Monthly and Annual Inspections

OSHA 1910.157(E) Fire Extinguishers require monthly and annual inspections to ensure they are functional and ready for use in an emergency. Anything can happen and you need to be prepared.

## 6 Year Inspections

This is known as a breakdown inspection or service. The extinguisher is taken apart, inspected and refilled by our licensed professionals as required by NFPA

## Recharging

This is very important and should be done in the following situations:

- After each use
- Slow pressure loss

An empty extinguisher won't put out a fire!

## Hydrotesting

OSHA 1910.157(F) Hydrotesting is necessary to ensure the fire extinguisher is working properly and has no faults that are not visible to the naked eye. This includes issues with the threads, seals, or shell.

**Call today to get yours inspected 330-477-1100.**

# Formal Certified Training

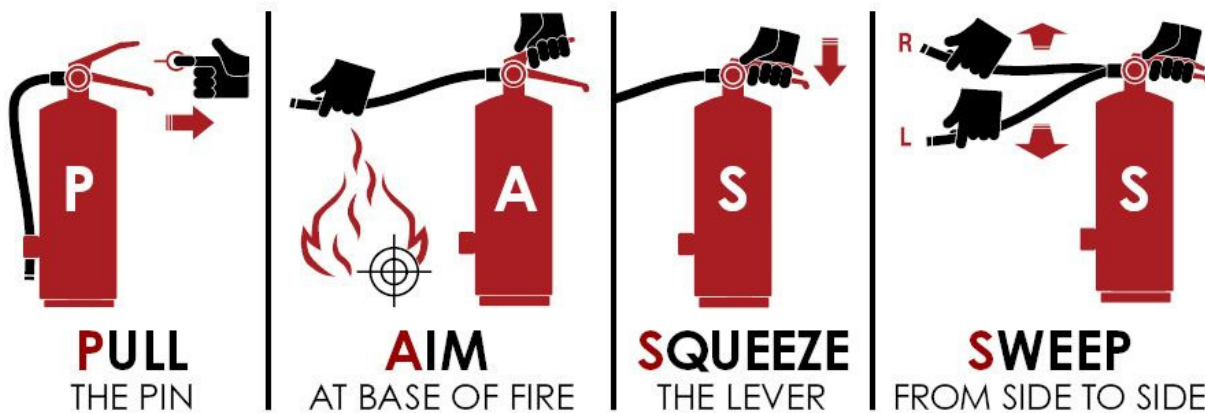

**Our professional training is available either at your facility or our office.**

- Classes are typically 2 hours long
- We review types of fires and fire extinguishers
- When to use a fire extinguisher
- How fire extinguishers work

**Includes classroom training and hands on experience.**

## HOW TO USE A FIRE EXTINGUISHER

**OSHA 1910.157(G)(1):** Where the employer has provided portable fire extinguishers for employees use in the workplace, the employer shall also provide an education program to familiarize employees with the general principles of fire extinguisher use and the hazards involved with incipient stage fire fighting.

# We also offer:

- **Confined Space Services**
- **Drug Testing**
- **Equipment Sales and Rentals**
- **Fit Testing and Medical Evaluations**
- **Industrial Hygiene Services**
- **Lead Testing Services**

- **Maintenance Shutdown and Outages**
- **On-Site Safety Inspections & Audits**
- **PPE Sales**
- **Professional Representation**
- **Safety Labeling and Signage**
- **Safety Policies**
- **Video Production and Services**
